

Jacket — Custom Measurement Guide

Check the standard chart below to find your starting size, or take the 8 measurements further down for a fully custom fit.

Before you start: measure over a light t-shirt, standing naturally. Keep the tape snug, not tight.

Standard reference ranges (cm unless noted). For an exact fit, use the custom measurement steps below.

Custom Measurement Steps

1) Chest

All the way around the chest, at the fullest point. Arms down, don't inflate your chest.

2) Shoulder Width

Across the back, seam to seam, from one shoulder point to the other.

3) Sleeve Length

From the top of the shoulder to the wrist bone, arm relaxed.

4) Garment / Body Length

From the base of the collar, straight down the back, to where you want the jacket to end.

5) Bicep

Around the widest point of the upper arm, arm flexed at 90 degrees.

6) Neck

Around the base of the neck, for an accurate collar fit.

7) Waist

Circumference of the waist, for a fitted / racing-cut jacket.

8) Height

Top of the head to the bottom of the foot — used for proportional reference.

Measurements For Women

For a women's-fit order, please also provide the following in addition to the steps above:

1) Upper Bust

Around the upper bust, horizontally.
Arms down at your side.

2) Middle Bust

Around the bust over the fullest point,
parallel to the floor.

3) Under Bust

Around the body at the breastbone.
Arms down at your side.

4) Shoulder to Bust

From the high shoulder point down to
the fullest point of the bust.
